

# Processing a Segmented Image using Blade

- [Supported Segment Image Extensions](#)
- [Other Segmented Image File Formats](#)

## Supported Segment Image Extensions

Blade can process multi-segment DD disk images as if they were from a monolithic disk image. Blade supports the following image file extension formats:

Supported Segment Image Extensions	
Three digit extension starting at zero	*.000
Three digit extension starting at one	*.001

Table 1

## Other Segmented Image File Formats

If you have a forensic hardware or software tool which writes out the segments using a different format from that in Table 1, please contact us and we will see if we can add support for it in our products.
