Introduction

This release of HstEx® adds support for Microsoft Edge (Chromium) and Opera GX browsers. The full change log for this release can be reviewed here: [Change Log HstEx v4.10](#).

New Features

Recovery of Login Data » stats Entries

We have added support for the recovery of Login Data stats entries for Chromium based browsers. This table records the number of times a user has logged into a password protected domain and dismissed the save password dialogue (for a maximum of three times). Once three instances have been recorded, the browser will no longer offer to save the username/password for the domain.
