

UC Browser

Introduction

UC Browser is a mobile browser developed by Chinese mobile Internet company [UCWeb](#). Originally launched in April 2004 as a **J2ME-only** application, it is available on platforms including Android, iOS, Windows Phone, Symbian, Java ME, and BlackBerry.

With a huge user base in China, India, Indonesia, Pakistan and continued growth in emerging regional markets, UC Browser reached 100 million global users in March 2014. According to StatCounter, UC browser is the second most used smartphone/mobile web browser worldwide, passing Safari in October 2015.
