

# NetAnalysis v1.57

This release of NetAnalysis is a maintenance release which adds support for the latest versions of Google Chrome, Mozilla Firefox and Opera Blink.

## 19th February 2014

We have released v1.57.14023.7 today to fix an issue with processing some corrupt IE9 data where NetAnalysis may hang during import. See the [release notes](#) for the download link.

### Known Issues

NetAnalysis® v1.5x does not support USB dongle licences on Windows 8. An updated driver is required. Installing [HstEx® v3.10](#) will update the driver allowing the USB licence dongle to be detected.
