New Feature

- [NET-157] - Added support for Firefox [formhistory.sqlite](#) file (moz_formhistory)
- [NET-165] - Updated licence detection routines
- [NET-183] - Added URN field to the Advanced Report for cross-referencing
- [NET-185] - Added the ability to tag all filtered records with the same bookmark text (and remove all bookmarks from filtered records)
- [NET-196] - Added support for Firefox downloads from [downloads.sqlite](#)
- [NET-244] - Added support to export c2body Page Content from the [History Index YYYY-MM](#) file (pages_content)
- [NET-248] - Added support for Google Chrome History [Page Transitions](#)
- [NET-249] - Added support for HstEx v3.8 AFF image processed data
- [NET-253] - Added support for Google Chrome [Web Data](#) file (autofill)
- [NET-254] - Added support for Google Chrome [History Index YYYY-MM](#) files (pages_content)
- [NET-255] - Added support for Google Chrome [Archived History](#) file
- [NET-256] - Added support for Google Chrome [Login Data](#) file (logins)
- [NET-282] - Added support for Firefox v12 [moz-page-thumb](#) entries

Improvement

- [NET-188] - File » Open History filters updated for new file support
- [NET-236] - Internet Explorer title block visit count (can recover IE secondary hit count object)
- [NET-237] - Ability to read AFF metadata from HstEx file format v3
- [NET-243] - Application error message box updated with new Knowledge Base links
- [NET-245] - Source file version identification and reporting enhanced
- [NET-258] - Error log name updated with a more user friendly date time format
- [NET-271] - Ability to sort fields in SQL query builder
- [NET-275] - Ability to filter and rebuild selected cached pages or objects
- [NET-286] - Token column added (URL category column has been replaced by the Token column. URL category was reserved for later use and is currently not required)

Bug Fix

- [NET-189] - "ReadingFirefox v 1-2 History" typo - space missing between Reading and Firefox
- [NET-197] - Broken quick start guide link in program shortcuts
- [NET-198] - Time zone warnings not generated for HstEx import on Daily INDEX.DAT records
- [NET-199] - Incorrect description on SQL example files when viewed in Explorer shell
- [NET-241] - Results window warning not clearing down after warning being displayed
- [NET-247] - Crash processing Safari v5.1 cache.db file due to changes in file format
- [NET-251] - Issue opening SQLite databases on read-only media if Write Ahead Logging (WAL) version
- [NET-257] - Crash when reading cache map from Firefox Cache.Trash or Cache.Trash_000 folder
- [NET-265] - Error log file size not capped
- [NET-267] - Licence 'Valid From' date incorrect on USB dongle licence
- [NET-272] - Search for a URN with an exact match search causes an exception
- [NET-274] - Export folder greyed out if further data is imported without setting
- [NET-278] - Hostnames not being resolved with wyciwyg Firefox entries
- [NET-280] - Firefox v12 is misrepresenting moz-page-thumbnail PNG files as cached web pages which is causing page rebuilding to fail
- [NET-281] - Firefox v3.6 sign-ons table schema change raises an exception
