

# NetAnalysis v1.55

## Overview

This release of NetAnalysis is a maintenance release which fixes four minor issues identified with NetAnalysis v1.54 and adds some new features. The handling of Google Chrome cache data has been improved to cater for changes in the Chrome cache format. It also includes some enhancements to assist with identifying the source of recovered browser artefacts. Please see the Change Log for the full list of changes.

Since the release of NetAnalysis v1.54, there have been major releases of Mozilla Firefox, Google Chrome and Opera. NetAnalysis has been tested against these latest versions. Please see the list of Supported Browsers for NetAnalysis v1.55. Please see the following list:

- [Full Change Log for version 1.55](#)
- [List of supported browsers and versions](#)

The corresponding version of HstEx for this release of NetAnalysis is HstEx v3.9.
