Creating and Using Keyword Lists

- Introduction
- Creating a New Keyword List
- Editing / Renaming or Deleting a Keyword List
- Searching with a Keyword List
- Clearing Keyword Search Hits

Introduction

NetAnalysis® has a Keyword List Manager which allows the user to create, store, manage and re-use lists of keywords or phrases to be searched against imported data.

Creating a New Keyword List

Keyword lists are managed within the Keyword Manager. To open the Keyword Manager select the following menu: View » Keyword Manager. This will open the Keyword Manager Panel as shown below:

To create a new Keyword List, right click on any folder (or the root Keyword List) and click on "New Keyword List..." as shown below. If you wish to categorise your Keyword List, you can create a new folder in the Keyword Manager. The new Keyword List can either be created in the new folder, or dragged there at a later date.

ñ	New Keyword List				
*	New Folder				
×	Delete				
10	Rename				
\$	Open Folder				
R	Clear Search				
参	Refresh				

Clicking on the New Keyword List item from the right-click menu launches the Create New Keyword List window as shown below.

5	Create New Keyword List	- 🗆 🗙
Keywords		
Keyword List Name		
New file		
Keyword List		
1		
	OK	Cancel

The first step is to give the new list a name. You can then either type / paste a list of keywords into the list below. Make sure you do not accidentally add unwanted spaces or non-printable characters. When the list is complete, just press OK. The list can easily be edited at a later date.

			ОК	Cancel

Editing / Renaming or Deleting a Keyword List

To edit a keyword list, select the list, right-click and click "Open Keyword List". This will open the Edit Keyword List window. To rename a keyword list, select this list, right-click and click "Rename" from the menu, then enter the new name for the list. To delete a keyword list, select the list, right-click and click "Delete" from the menu.

key phrases will

Searching with a Keyword List

To search your imported data against a keyword list, select the list from the Keyword Manager and right-click; when the context-menu is displayed, click on "Search Keywords". The following window will show the searching progress:

٢	Searching for Keywords	×
Status	Information	^
f Info	Searched for keyword: m-cat - hits: 3	
A Info	Searched for keyword: m-smack - hits: 0	
A Info	Searched for keyword: magic crystals - hits: 0	
f Info	Searched for keyword: magic mushrooms - hits: 0	
f Info	Searched for keyword: magics - hits: 0	
Info	Searched for keyword: mandy - hits: 0

		Pause Cancel

When each keyword in the list has been searched, the search results window will appear showing a summary count for each keyword that was found in the imported data.

To review the keyword hits in the grid, right-click on a keyword and select "Search" from the menu (or double-click a keyword hit item). This will filter the records in the grid and highlight any keyword hits for easy review. The window below shows the keyword "cannabis" has been selected for review. All the records containing the word "cannabis" are shown in the grid.
