Notes

Version 3 is a major release of NetAnalysis® and adds over 200 new artefacts as well as new support for mobile and portable browsers. The user interface has been completely re-written and adds major improvements and new features in a number of key areas. We have improved the layout of the user interface, with the goal of improving productivity, and added support for light and dark themes. Our grids now boast Excel style column filtering with easy access string, number and date filtering. Another key feature is the built-in Properties Examiner with powerful analysis and reporting of browser preferences. For further information, please see NetAnalysis v3.0.
