## Notes

This is the first release of NetAnalysis® v2. Through a significant investment in research and development, we have authored a completely new ground-breaking product, engineered through innovation and fresh thinking. NetAnalysis® v2 is a state-of-the-art application for the extraction, analysis and presentation of forensic evidence relating to Internet browser and user activity on computer systems and mobile devices. It is a software product that offers significant improvements over existing applications and methodologies.

See the following for a more detailed outline of the new features: [What's New](#)
