HstEx v4.10

Introduction

This release of HstEx® adds support for Microsoft Edge and Opera GX browsers. The full change log for this release can be reviewed here: Change Log HstEx v4.10.

New Features

Recovery of Login Data » stats Entries

We have added support for the recovery of Login Data stats entries for Chromium based browsers. This table records the number of times a user has logged into a password protected domain and dismissed the save password dialogue (for a maximum of three times). Once three instances have been recorded, the browser will no longer offer to save the username/password for the domain.

Microsoft Edge

In December 2018, Microsoft announced their intention to adopt the Chromium open source project in the development of their Microsoft Edge browser. As of July 2019, they have released Developer and Canary editions. Microsoft Edge is currently available for Windows 7, 8, 8.1 and 10 as well as supporting macOS.

We have added support for the recovery of the following Microsoft Edge (Chromium) data:

Microsoft Edge (Chromium) v74 - 77 ✓
- History Entries ✓
- Download Entries ✓
- Cookie Entries ✓
- Cache Entries ✓
- Simple Cache Entries ✓
- Keyword Search Term Entries ✓
- Autofill Entries ✓
- Login Data Entries ✓
- Login Stats Entries ✓
- Shortcut Entries ✓

Opera GX

Opera GX is a special version of the Opera browser built specifically to complement gaming. The web browser includes unique features to help the user get the most out of both gaming and browsing. It is a desktop web browser for Windows PCs.

We have added support for the recovery of the following Opera GX data:
