

Blade v1.0 to 1.20

Release Notes and Change Log

The following links will take you to the full release history and change logs for Blade® v1.

Blade v1.20

- [Change Log v1.20](#) — Blade® v1.20 brings a number of improvements to our Intelli-Carve® system, along with an enhanced Zip archive and ISO/BMFF Video recovery engine. We have enhanced the Mime identification system and made some minor UI improvements.

Blade v1.19

- [Change Log v1.19](#) — Blade® v1.19 contains a number of improvements designed to enhance the processing of Expert Witness E01, L01, Ex01, Lx01 and Smart images.

Blade v1.18

- [Change Log v1.18](#) — In this release, Blade® v1.18 incorporates an improved SQLite database recovery engine and identification system. Our bundled DataDump™ tool has also been updated and we have added an updated form for selecting Physical and Logical devices for processing.

Blade v1.17

- [Change Log v1.17](#) — Blade® v1.17 brings an improvement to our Link File and Jump List extraction and fixes an issue that is sometimes encountered.

Blade v1.16

- [Change Log v1.16](#) — Blade® v1.16 resolves an EndOfStreamException issue that is sometimes encountered when recovering corrupt JPEG images. We have also added a fix to resolve issues running on Federal Information Processing Standards (FIPS) machines, which are now supported.
