

Naver Whale

Naver Whale Browser

Naver Whale is a Chromium-based web browser developed by South Korean technology company Naver Corporation. It is available on Windows, Linux, Android and iOS platforms and in English and Korean languages.

Naver Whale also has the ability to conduct video conferencing without worrying about time limits through its 'Whale On' feature. Up to 500 people can access this feature simultaneously, and access various functions such as screen sharing and microphone/camera control.
